CoronaVirus IS an OFFENSIVE Bio-Warfare Weapon
Many Countries are Involved - Dr. Francis Boyle

Pam Barker | Director of *TLB* Europe Reloaded Project

We're putting two *Zerohedge/GreatGameIndia* stories back to back here. India is indeed going to investigate the **Wuhan Institute of Virology**, and **Dr. Francis Boyle**, drafter of the US Bioweapons Act, claims the coronavirus is certainly a biological weapon, one of many.

We remind readers of a Whitney Webb piece we published this week titled Bats, Gene Editing and Bioweapons: Recent DARPA Experiments Raise Concerns Amid Coronavirus Outbreak.

We highly recommend watching the interview below with Dr. Francis Boyle for a fuller perspective on the development of lethal, genetically engineered bio-weaponry, which is part of an ongoing agenda, initiated and pushed through US military intelligence, with Big Pharma, military intelligence in *many countries,* Bill Gates and globalist organizations, etc. BSL-4 labs, of which Wuhan is one, are basically set up to develop lethal, offensive bioweapons.

He underscores that **vaccines have been developed for this** regardless of what's been claimed, and that no-one should trust anything being offered as a vaccine since it would probably **contain a live instance of the coronavirus.**

Dr. Francis Boyle has been completely blackballed by government and MSM, as he explains. No surprises there.

Here is the *Amazon* link to his book, Biowarfare and Terrorism.

On balance, from Dr. Boyle's account, this wouldn't seem to be a story involving any good guys whatever. It seems there are only bad guys, with an agenda that needs exposing. It's yet another case of an arms race extending into the biowarfare realm.

****

India To Probe Wuhan Institute Of Virology

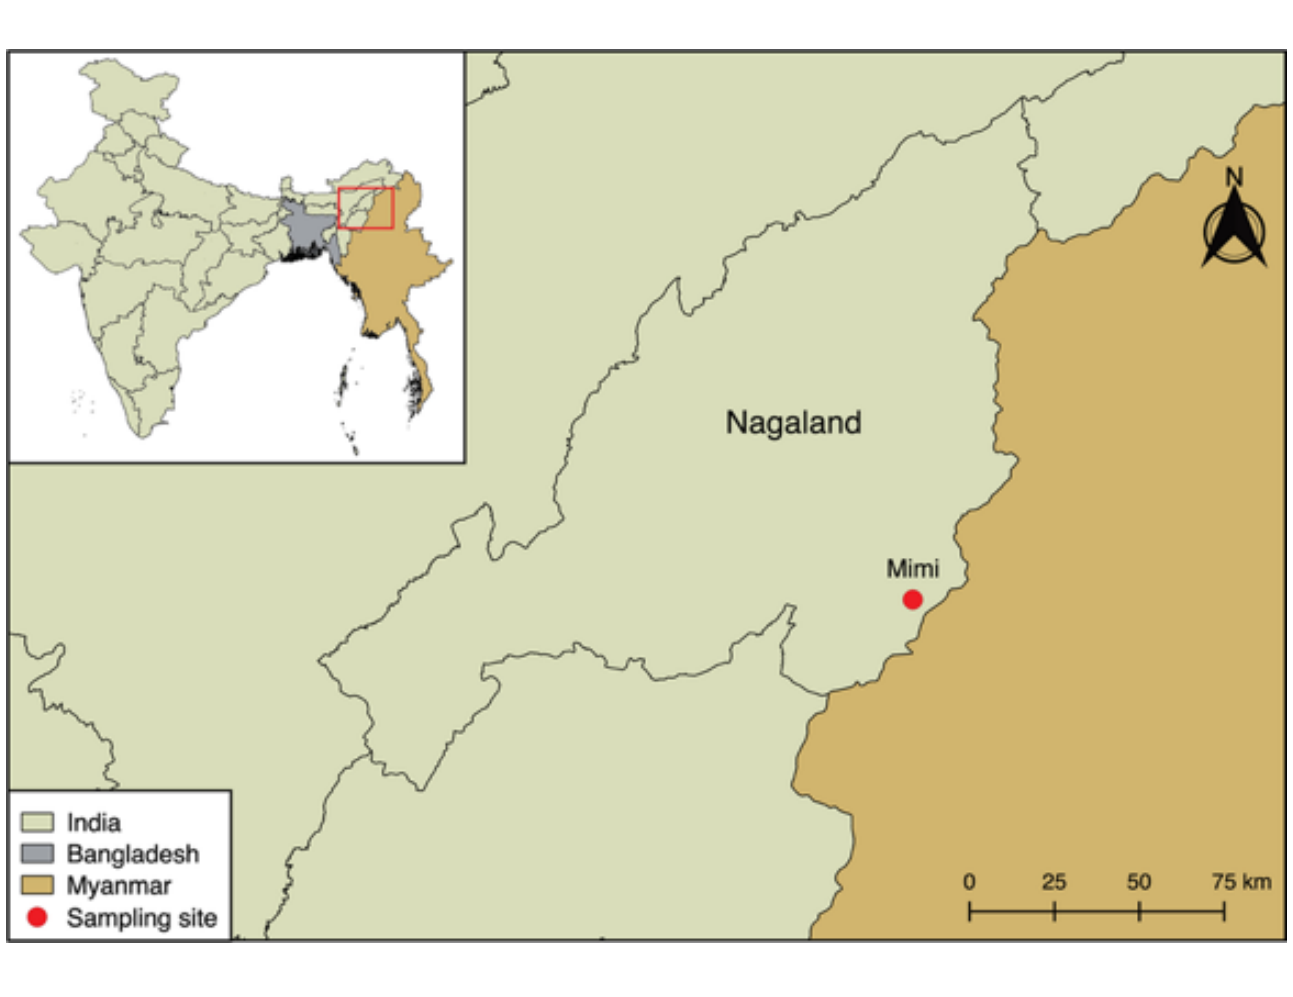
TYLER DURDEN

It appears that around the time we suggested someone reach out to the **Wuhan Institute of Virology** to get some answers about the origin of the deadly Coronavirus epidemic (which Twitter decided was sufficient to get us barred from the platform), **India was doing just that.**

According to The Hindu and Great Game India, after Indian scientists were forced to withdraw their study concluding **Coronavirus was injected with HIV AIDS virus** amidst massive online criticism from Social Media experts, now **Indian authorities have launched an investigation against China's Wuhan Institute of Virology.**

AN INSTITUTE
CRIME SCENE
INDIA TO INVESTIGATE WUHAN INSTITUTE OF VIROLOGY

The Indian government has ordered an inquiry into a study conducted in the Northeastern state of Nagaland (close to China) by researchers from the U.S., China and India on bats and humans carrying antibodies to deadly viruses like Ebola, officials confirmed to ***The Hindu***.



The study came under the scanner as **two of the 12 researchers belonged to the Wuhan Institute of Virology**'s Department of Emerging Infectious Diseases, and it was **funded by the United States Department of Defense's Defense Threat Reduction Agency (DTRA).** They would have required special permission as foreign entities.

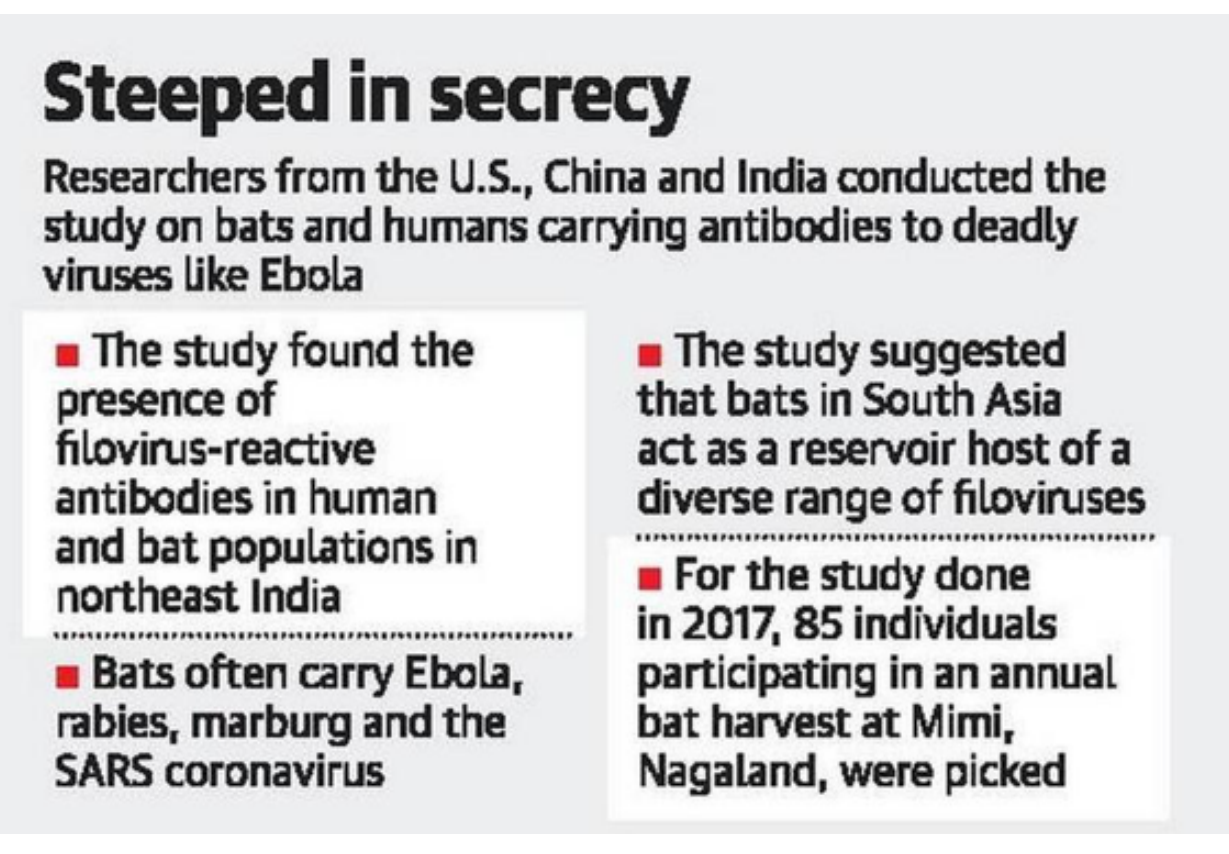
The study, conducted by scientists of the Tata Institute of Fundamental Research, the National Centre for Biological Sciences (NCBS), the Wuhan Institute of Virology, the Uniformed Services University of the Health Sciences in the U.S. and the Duke-National University in Singapore, is now being investigated for **how the scientists were allowed to access live samples of bats and bat hunters (humans) without due permission**.

The results of the study were published in October last year in the *PLOS Neglected Tropical Diseases* journal, originally established by the Bill and Melinda Gates Foundation.

Bill Gates, the man who tops the Forbes richest person in the world list, had issued a **grave warning about a potential** Coronavirus-like catastrophe **that could kill 30 million people** at the Munich Security Conference held in Germany in 2017:

> *"Whether it occurs by a quirk of nature or at the hand of a terrorist, epidemiologists say a fast-moving airborne pathogen could kill more than 30 million people in less than a year. And they say there is a reasonable probability the world will experience such an outbreak in the next 10 to 15 years."*

"The Indian Council of Medical Research (ICMR) sent a five-member committee to investigate. The inquiry is complete, and a report has been submitted to the Health Ministry," a senior government official told *The Hindu*.



Steeped in secrecy

Researchers from the U.S., China and India conducted the study on bats and humans carrying antibodies to deadly viruses like Ebola

- The study found the presence of filovirus-reactive antibodies in human and bat populations in northeast India
- Bats often carry Ebola, rabies, marburg and the SARS coronavirus
- The study suggested that bats in South Asia act as a reservoir host of a diverse range of filoviruses
- For the study done in 2017, 85 individuals participating in an annual bat harvest at Mimi, Nagaland, were picked

The U.S. Embassy and the Union Health Ministry declined to comment on the inquiry. In a written reply to questions from *The Hindu*, the U.S. Centre for Disease Control (CDC) in Atlanta said it "did not commission this study and had not received any enquiries [from the Indian government] on it." An American official, however, suggested that the U.S. Department of Defense might not have coordinated the study through the CDC.

The study, '***Filovirus-reactive antibodies in humans and bats in Northeast India imply Zoonotic spillover***', published in *PLOS Neglected Tropical Diseases* states the researchers found "the presence of filovirus (e.g. ebolavirus, marburgvirus and dianlovirus) reactive antibodies in both human (e.g. bat hunters) and bat populations in Northeast India, a region with no historical record of Ebola virus disease."

It adds: "Ebola has posed a global health threat several times, most notably from 2013 to 2016. It is a deadly disease, with a fatality rate of roughly 50 percent." Now, according to health officials, 2019-nCoV, too, has acquired the ability to pass between people and can do so before symptoms appear.

The Nagaland study suggests bats in South Asia act as a reservoir host of a diverse range of filoviruses, and filovirus spillover occurs through human exposure to these bats. For the study done in 2017, 85 individuals participating in an annual bat harvest at Mimi, Nagaland, were picked. The majority of bat hunters were male, aged between 18 and 50, and participated at least eleven times in the harvest. The study says the potential virus present in the bats may not be an exact copy of the virus responsible for various outbreaks.

Given the widespread challenges from the newly discovered viruses, officials say they want to take no chance on their spread and will take action to ensure all medical studies in the country adhere to strict norms.

Indian military believes that the U.S. Center for Disease Control in Atlanta was involved in the 1994 plague in the Indian city of Surat which killed 52 people and close to a quarter of the city's citizens fled the area for fear of being quarantined. Even the origin of 1994 plague is mired in controversy to this day.

R. Prasannan, the New Delhi Bureau Chief of *The Week* magazine, in his piece questioning whether Coronavirus was created in a lab wrote,

> ***During the 1994 plague outbreak in Surat and Beed, it was found that the germs had an extra protein ring which could only have been inserted artificially.*** *Indian scientists had raised concerns about a US biowar experiment having gone awry. THE WEEK had carried reports giving details of germ war research being carried on in labs under the Centre for Disease Control in Atlanta and about a newly developed germ detector being tested. The US embassy had denied the allegations. There were also reports that the Surat germ could have been developed in a lab in Almaty, Kazakhstan.*

Mr. Prasannan is one of many experts from different fields who have raised doubts over the narrative being paddled by certain sections of the media. Among them is American Senator **Tom Cotton**, who questioned mainstream media's narrative on the origin of 2019 Wuhan Coronavirus, instead hinting that a biosafety laboratory in Wuhan working with the deadliest pathogens in the world could be the true source.

Even Dr. Francis Boyle, who drafted the Biological Weapons Act, said in an explosive interview that **the** 2019 Wuhan Coronavirus **is an offensive** Biological Warfare Weapon **and that the World Health Organization (WHO) already knows about it.**

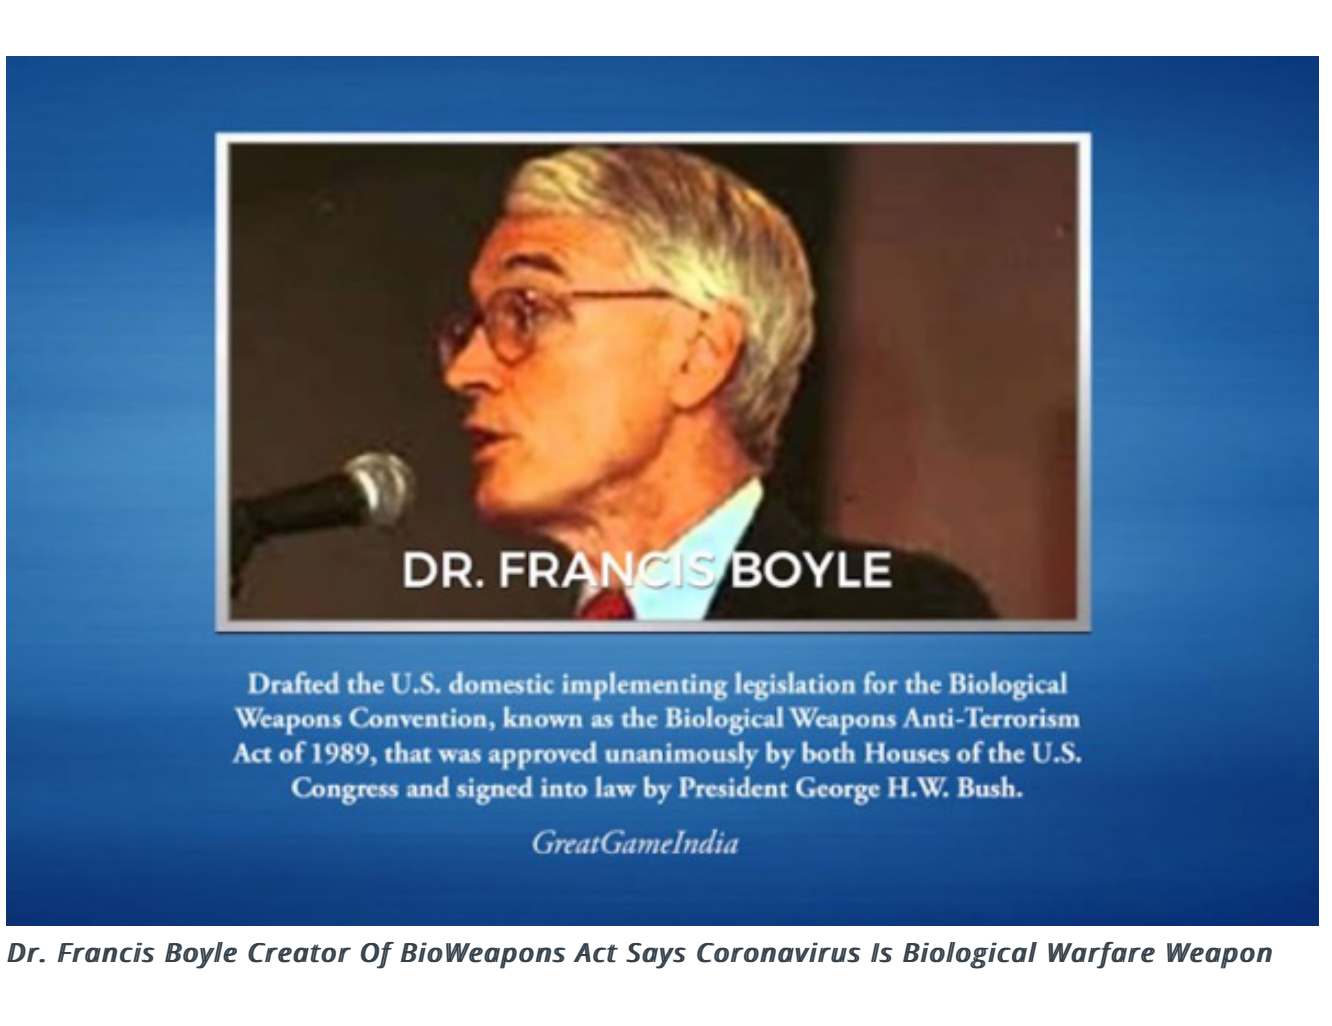
Dr. Francis Boyle Creator Of BioWeapons Act Says Coronavirus Is Biological Warfare Weapon

GreatGameIndia

In an explosive interview Dr. Francis Boyle, who drafted the Biological Weapons Act has given a detailed statement admitting that the 2019 Wuhan Coronavirus is an offensive Biological Warfare Weapon and that the World Health Organization (WHO) already knows about it.



DR. FRANCIS BOYLE
Drafted the U.S. domestic implementing legislation for the Biological Weapons Convention, known as the Biological Weapons Anti-Terrorism Act of 1989, that was approved unanimously by both Houses of the U.S. Congress and signed into law by President George H.W. Bush.
GreatGameIndia

Dr. Francis Boyle Creator Of BioWeapons Act Says Coronavirus Is Biological Warfare Weapon

Francis Boyle is a professor of international law at the University of Illinois College of Law. He drafted the U.S. domestic implementing legislation for the Biological Weapons Convention, known as the Biological Weapons Anti-Terrorism Act of 1989, that was approved unanimously by both Houses of the U.S. Congress and signed into law by President George H.W. Bush.

In an exclusive interview given to *Geopolitics and Empire*, Dr. Boyle discusses the coronavirus outbreak in Wuhan, China and the Biosafety Level 4 laboratory (BSL-4) from which he believes the infectious disease escaped. He believes the virus is *potentially lethal and an offensive biological warfare weapon or dual-use biowarfare weapons agent, genetically modified with* ***'gain-of-function'*** *properties (ER: this means a virus becomes more lethal, and can be transmitted more easily through the air, for example, at greater distances, such as 6-8 feet instead of just 2 feet),* **which is why the Chinese government originally tried to cover it up and is now taking drastic measures to contain it.** The Wuhan BSL-4 lab is also a **specially designated World Health Organization (WHO) research lab** and Dr. Boyle contends that the WHO knows full well what is occurring.

Dr. Boyle also touches upon ***GreatGameIndia***'s exclusive report Coronavirus Bioweapon – where we reported in detail how **Chinese Biowarfare agents working at the Canadian lab in Winnipeg were involved in the smuggling of Coronavirus to Wuhan's lab from where it is believed to have been leaked.**

Watch Dr. Francis Boyle's interview with Geopolitics and Empire below:

This video has been removed for violating YouTube's Terms of Service

Dr. Boyle's position is in stark contrast to the mainstream media's narrative of the virus being originated from the seafood market, which is increasingly being questioned by many experts.

Recently, American Senator Tom Cotton of Arkansas also dismantled the mainstream media's claim on Thursday that pinned the coronavirus outbreak on a market selling dead and live animals.

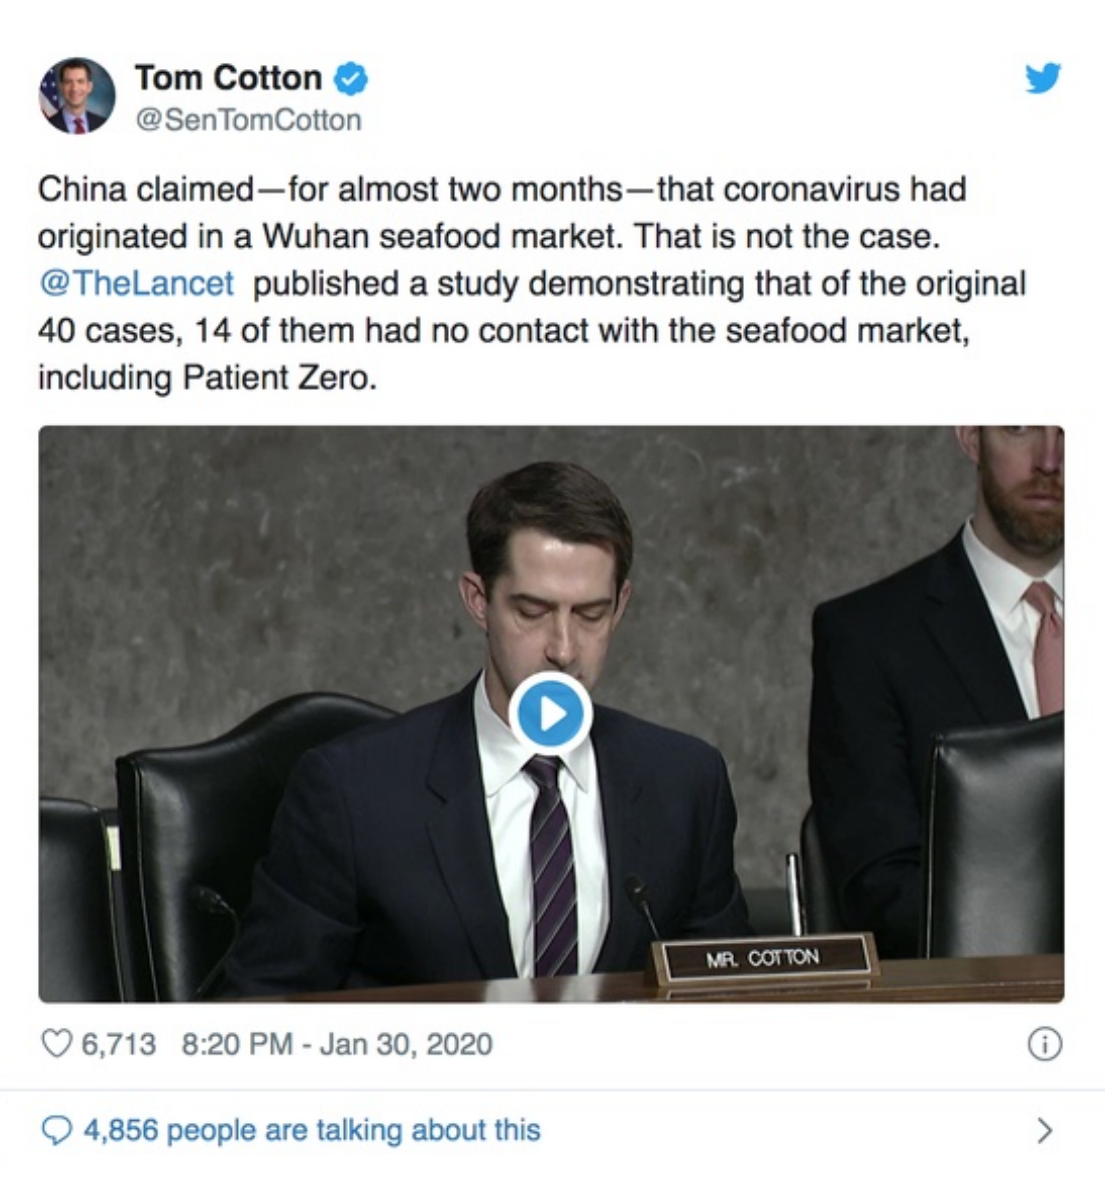
In a video accompanying his post, Cotton explained that the Wuhan wet market (which Cotton incorrectly referred to as a seafood market) has been shown by experts to *not be the source of the deadly contagion.*

Cotton referenced a Lancet study which showed that many of the first cases of the novel coronavirus, including patient zero, had no connection to the wet market — devastatingly undermining mainstream media's claim.

"As one epidemiologist said: 'That virus went into the seafood market before it came out of the seafood market.' We still don't know where it originated," Cotton said.

"I would note that Wuhan also has China's only bio-safety level four super laboratory that works with the world's most deadly pathogens to include, yes, coronavirus.

> ***LINK: 8:20 PM – Jan 30, 2020***



Tom Cotton
@SenTomCotton

China claimed—for almost two months—that coronavirus had originated in a Wuhan seafood market. That is not the case. @TheLancet published a study demonstrating that of the original 40 cases, 14 of them had no contact with the seafood market, including Patient Zero.

Such concerns have also been raised by J.R. Nyquist, the well known author of the books "*Origins of the Fourth World War*" and "*The Fool and His Enemy*," as well as co-author of "*The New Tactics of Global War*". In his insightful article he published secret speeches given to high-level Communist Party cadres by Chinese Defense Minister Gen. Chi Haotian, explaining a **long-range plan for ensuring a Chinese national renaissance – the catalyst for which would be** China's secret plan to weaponize viruses.

Nyquist gave three different data points for making his case in analyzing Coronavirus. He writes:

> *The third data point worth considering: the journal* ***GreatGameIndia*** *has published a piece titled "****Coronavirus Bioweapon*** *– How China Stole Coronavirus From Canada And Weaponized It."*
>
> *The authors were clever enough to put Khan's Virology Journal article together with news of a* ***security breach by Chinese nationals at the Canadian (P4) National Microbiology Lab*** *in Winnipeg, where the novel* ***coronavirus was allegedly stored*** *with other lethal organisms. Last May, the* ***Royal Canadian Mounted Police were called in to investigate****; by late July the* ***Chinese were kicked out of the facility****. The chief Chinese scientist (****Dr. Xiangguo Qiu****) was allegedly making trips between Winnipeg and Wuhan.*
>
> ***Here we have a plausible theory of the NCoV organism's travels: first*** ***discovered in Saudi Arabia****,* ***then*** ***studied in Canada*** ***from whence it was*** ***stolen by a Chinese scientist*** ***and brought to Wuhan****. Like the* ***statement of Taiwan's intelligence chief*** *in 2008, the* ***GreatGameIndia*** *story has come under* ***intensive attack****. Whatever the truth, the fact of proximity and the* ***unlikelihood of mutation*** *must figure into our calculations.*

It's highly probable that the *2019-nCoV organism is a weaponized version* ***of the NCoV discovered by Saudi doctors in 2012.***

Meanwhile, the mainstream media's narrative still maintains that the origin of the 2019 Coronavirus is the Wuhan Seafood Market. After ***GreatGameIndia*** published the story on Coronavirus Bioweapon – **not only was our databse tinkered with and our** reports blocked by Facebook **on the flimsy reason that they could not find** GreatGameIndia Facebook page, **but the report itself was viciously attacked by Foreign Policy magazine,** PolitiFact (known widely as Facebook's propaganda arm) **and BuzzFeedNews.**

It is not ***GreatGameIndia*** alone which is being viciously attacked. Zero Hedge, a popular alternate media blog, was suspended by Twitter for publishing a story related to a study by Indian scientists finding 2019 Wuhan Coronavirus to be not naturally evolved, raising the possibility of it being created in a lab. Shockingly, the study itself came under intense online criticism by Social Media experts resulting in the scientists withdrawing the paper.

In retaliation India has launched a full-scale investigation against China's Wuhan Institute of Virology. The Indian government has ordered an inquiry into a study conducted in the Northeastern state of Nagaland (close to China) by researchers from the U.S., China and India on bats and humans carrying antibodies to deadly viruses like Ebola.

The study came under the scanner as two of the 12 researchers belonged to the Wuhan Institute of Virology's Department of Emerging Infectious Diseases, and it was funded by the United States Department of Defense's Defense Threat Reduction Agency (DTRA).

The study, conducted by scientists of the Tata Institute of Fundamental Research, the National Centre for Biological Sciences (NCBS), the Wuhan Institute of Virology, the Uniformed Services University of the Health Sciences in the U.S. and the Duke-National University in Singapore, is now being investigated for how the scientists were allowed to access live samples of bats and bat hunters (humans) without due permissions.

The results of the study were published in October last year in the *PLOS Neglected Tropical Diseases* journal, originally established by the Bill and Melinda Gates Foundation.

As the author J.R. Nyquist puts it:

> *We must have an investigation of the outbreak in Wuhan. The Chinese must grant the world total transparency. The truth must come out. If Chinese officials are innocent, they have nothing to hide. If they are guilty, they will refuse to cooperate.*
>
> *The real concern here is whether the rest of the world has the courage to demand a real and thorough investigation. We need to be fearless in this demand and not allow "economic interests" to play a coy and dishonest game of denial. We need an honest inquiry. We need it now.*
